CERTIFICATE

This is to certify that the Lab work entitled "Analysis and Design of Algorithms" carried out by RUSHIL MAGAZINE (1BM22CS225), who is bonafide student of B.M.S. College of Engineering. It is in partial fulfillment for the award of Bachelor of Engineering in Computer Science and Engineering of the Visvesvaraya Technological University, Belgaum during the academic semester April-2024 to August-2024. The Lab report has been approved as it satisfies the academic requirements in respect of an Analysis and Design of Algorithms (23CS4PCADA) work prescribed for the said degree.

Index Sheet

	Find Minimum Cost Spanning Tree of a given undirected graph using Kruskal's algorithm. Implement Fractional Knapsack using Greedy technique. Implement "N-Queens Problem" using Backtracking.	

Course Outcome

CO1	Analyze time complexity of Recursive and Non-recursive algorithms using asymptotic notations.
CO2	Apply various design techniques for the given problem.
CO3	Apply the knowledge of complexity classes P, NP, and NP-Complete and prove certain problems are NP-Complete
CO4	Design efficient algorithms and conduct practical experiments to solve problems.
